

Environmental Protection Policy

Rutpen Limited recognise that our activities have the potential to cause harm to the environment.

Therefore, environmental protection forms one of the core values of our business and our practices support this. To ensure our processes are industry leading we have achieved the ISO14001 standard.

We are committed to continuously improving our environmental performance, with an aim to ensure we operate in the most sustainable way, as a bare minimum in full compliance with environmental regulations.

We understand that decisions we make today have a lasting impact on the environment both local and worldwide. As such we ensure that sustainability is engrained in our whole operation.

Doing the right thing for the environment is the responsibility of everyone at Rutpen. We will make all colleagues aware of this policy and the reasons behind it, provide adequate training and ensure our site and equipment is fit for purpose.

To meet our aims the Company is committed to:

- **The prevention of pollution** through robust control and design of assets.
- **Reducing waste** through the onsite adoption of the waste hierarchy and reducing waste to landfill.
- **Carbon reduction** through investment in green technology and intelligent energy use
- **Reducing consumption** of fuel, water and non-recyclable materials
- **Eliminating** the production of polluting releases to the environment
- **Compliance.** Striving to meet 100% compliance with our environmental permits
- **Innovation.** Investing in processes and equipment that can reduce our impact
- **Monitoring** and constant improvement of environment performance
- **Sourcing ethically** from contractors and suppliers with the same commitment to the environment
- **Socially Responsible**, working in partnership with authorities and local groups, promoting biodiversity on our site and the surrounding area.
